DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 23, 2004, amending claims 1, 4, 6, 7 and 10, canceling claims 5 and 11-21 and adding claims 22-23, has been entered.

Claims 1-4, 6-10 and 22-23 are pending.

Election/Restrictions

Newly submitted claims 22-23 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: claims 22-23 are drawn a polyhydroxyalkanoate. These claims would have been group with Invention II in the Restriction Requirement. These claims are patentably distinct from claims 1-4 and 6-10 because claims 1-4 and 6-10 are drawn to a method of making polyhydroxyalkanoates using microorganisms.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 22-23 are withdrawn from consideration

Art Unit: 1652

as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 and 6-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1-4 and 6-10, the unit of the molecular weight of the polyhydroxyalkanote monomers/polyhydroxyalkanoates is not clear.

Claims 1-4 and 6-10 are confusing because the claims are drawn to a method of producing polyhydroxyalkanoates from hydroxyalkanoates monomers have an average molecular weight of 300,000 da (line 14) and a polyhydroxyalkanote having a average molecular weight of at least 300,000 da. It is unclear if the monomers have a molecular weight of 300,000 da or the polyhydroxyalkanoate has a molecular weight of 300,000 da.

In claims 8-9, the phrase "for use in the method of claim 1" is confusing. To clearly limit claim 1 to a method of using an organism comprising an *aldH* and *dhaT*

Art Unit: 1652

genes, the claims can be amended as "The method of claim 1 wherein the organism expresses an *aldH* and *dhaT* genes", for example.

No claim is allowed.
